

DLNA/ Airplay

Enjoy your movies, videos, and music on the big screen by using DLNA /AirPlay as long as using the same internet connection between your smart devices and the iStage TV box.

01 DLNA (Digital Living Network Alliance)

DLNA can connect every device together through the Wi-Fi or cable, such as PCs, TVs, DV, media players, NAS, phones, tablets...and etc. to make the movie, photo, and music sharing become much easier and more convenient.

Instructions : Some Android apps support DLNA features. Only click the Cast icon and choose iStage TV box, this will allow you to broadcast content and watch it on the big screen.

02 Airplay

Airplay can also stream the iOS content and play it on the HDTV player, or cast the content from your device to the big screen.

Instructions : Some iOS apps support Airplay features. Only click the Cast icon  and choose iStage TV box, this will allow you to broadcast content and watch it on the big screen.

FCC

The device complies with Part 15 of the FCC Rules. Operations is subject to the following two conditions:
1)This device may not cause harmful interference, and
2)This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

The equipment generates, uses, and can radiate radio requery energy. If not installed and used in accordance with the instructions, may cause harmful interference to radio communications; however, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
-Consult the dealer or an experienced radio/TV technician for help.

Attention: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
